

PRESS RELEASE

➤ Start of industrial production of EOS_{TP} and wide format PPLF

Filago, 03 June 2020

Neodecortech S.p.A. ("**NDT**" or the "**Company**"), one of Europe's top players in the production of decorative papers for laminated panels and flooring for interior design, listed on the MTA, a regulated market organized and managed by Borsa Italiana S.p.A., announces the start of the industrial production of two new products: EOS_{TP} (ultra mat anti-fingerprint plastic surface) and the wide format PPLF (Plastic Printed Laminated Film).

EOS_{TP} is a plastic film in PET or PVC coming in a range of thicknesses and used for furniture or kitchen doors. Its distinctive features are its high opacity, scratch resistance, anti-fingerprint qualities and truly soft feel, and the chance to have it in the antibacterial version too. EOS_{TP} is positioned at the upper end of the range with new materials that have garnered widespread acclaim and recent success such as FENIX®.

The wide format PPLF (Plastic Printed Laminated Film), i.e. up to 160 cm, is instead obtained by laminating two plastic films of various thicknesses and is tailored particularly to the world of LVT (Luxury Vinyl Tiles) flooring. With special laminations, the PPLF can also be used for raised sheet-metal flooring ideally suited for office environments and, thanks to its wide format, also for covering panels used in caravans and as a replacement for traditional laminate in damp environments (i.e. shower cubicles).

CEO Luigi Cogni stated: "We have already received great feedback for the prototypes of the new products from the top leaders in our industry; these products are the result of investments made by our Company starting from the middle of last year up to May, and represent part of the strategy of diversification and increase in margins per product unit implemented ever since the introduction of plastic film as an additional medium to paper, on which the Group's turnover is still based. The main markets for these two new product categories are Europe and North America."
