

The *DL Bollette* strengthens Neodecortech's integrated energy strategy: Bio Energia Guarcino in operation until at least 2030

Filago, 23 February 2026

Neodecortech S.p.A. ("**Neodecortech**", the "**Company**" or "**NDT**"), one of Europe's top players in the production of decorative surfaces for laminated panels and flooring used in interior design, listed on Euronext Milan, organized and managed by Borsa Italiana S.p.A. - Euronext STAR Milan Segment, announces that following the enactment of Law Decree 19/25 (so-called "DL Bollette"), the Group confirms the operation of Bio Energia Guarcino (BEG) until at least 2030.

The measure establishes a clearer and more structured regulatory framework for bioliquid-fuelled plants, precisely governing the conditions for the application of the Guaranteed Minimum Prices (GMP) mechanism and clarifying the aspects that had created uncertainty for sector operators in recent months, thereby ensuring operational and regulatory visibility.

In the words of Massimo Giorgilli, CEO of Bio Energia Guarcino (BEG): *"The enactment of the new DL Bollette should be strongly welcomed because it establishes a regulatory framework that is finally clearer and more stable for the bioenergy sector. The measure precisely defines the conditions for the application of the Guaranteed Minimum Prices (GMP) mechanism, thereby restoring visibility and planning capacity to industrial operators."*

Specifically, for plants powered by sustainable materials and integrated into an industrial production cycle, such as BEG's facility connected to Cartiere di Guarcino, the continuity of the GMP mechanism until 2030 is confirmed. This represents a key element of stability and planning for our industrial activities. The implementation procedures will be governed by the Regulatory Authority for Energy, Networks and Environment (ARERA), in compliance with the principles of system sustainability and balanced public expenditure.

Giorgilli concluded: *"The DL Bollette therefore represents a tangible recognition of the value of energy generated in direct connection with an industrial process. A model that guarantees efficiency, operational continuity, stable energy costs and a tangible contribution to the transition towards a more circular and decarbonized economy."*

The Neodecortech Group confirms its commitment to developing integrated and sustainable energy models, aligned with decarbonization goals and with the need to strengthen the competitiveness of the Italian industrial system".

Neodecortech S.p.A.

Neodecortech is one of Europe's top players in the production of decorative surfaces for laminated panels and flooring used in interior design. The Group's business is in the production of complete and technologically advanced solutions for the realization of interior design projects, covering all stages of the production process for the production of decorative paper, from raw material management, through surface finishing and impregnation, up to the finished product and the management of end-of-line logistics.

The Group offers multiple product categories: decorative papers; decorative printings; finish foil; melamine film; PPF and PPLF, CPL laminates, CLPL laminates, EOS anti-fingerprint surfaces (www.neodecortech.it).
